Brief description of the subject of the contract	The subject of the contract is a research service consisting in the synthesis of peptides in a laboratory standard.
Ad category	Service
Announcement subcategory	Other services
Place of fulfillment	Wroclaw, Poland, abroad
Purpose of the contract	The purpose of the contract is to select a subcontractor who, as part of the peptide synthesis service in laboratory standard, will provide up to 10 long-acting peptides for the implementation of a preclinical innovative therapeutic program for use in cardiovascular diseases.
Subject of the contract	research service based on the synthesis of peptides in a laboratory standard (non-GLP). The contract will cover the following tasks: Synthesis of linear peptide sequence of 15 to 20 amino acids with fatty acids or fatty diacids conjugated via

	<p>short linkers, such as gamma-glutamic acid (g-Glu), 2-[2-(aminoethoxy)ethoxy]acetic acid (Aeea), or other short linkers. Peptides contain unnatural amino acids, including alpha-Methyl amino acids, D-amino acids, N-Methyl amino acids, beta-amino acids and amino acids with unnatural side chains. Peptides are synthesized at 20 mg scale and purified by RP-HPLC to greater than 90% purity and salt exchanged to acetate salts by ion-exchange chromatography. Peptides are characterized by LC-MS (liquid chromatography - mass spectroscopy) to confirm identity.</p> <p>The selected peptide, if it meets the assumed requirements, will be resynthesized on a scale of up to 500 mg.</p> <p>Detailed information on the subject and scope of the contract resulting from the project specifications should be read by e-mail or telephone after signing a confidentiality agreement.</p> <p>After the settlement of the procedure with the selected contractor, a CONDITIONAL AGREEMENT will be concluded, which will enter into force after the Contracting Authority signs the contract for financing the project to which this inquiry relates.</p>
